FOR IMMEDIATE RELEASE

**3M Posts Fourth-Quarter Sales of \$7.1 Billion and Earnings of \$1.35 per Share;  
Full-Year Sales Rise 11 Percent to \$29.6 Billion**

**ST. PAUL, Minn.** — Jan. 26, 2012 — 3M (NYSE: MMM) today reported record fourth-quarter sales of \$7.1 billion, up 5.7 percent year-on-year. Earnings were \$1.35 per share, an increase of 5.5 percent versus the fourth quarter of 2010. The company generated \$1.2 billion in free cash flow during the quarter, equal to 128 percent of net income.

Fourth-quarter organic local-currency sales growth was 3.3 percent, of which 1.3 percent came from organic volume improvement and 2.0 percent from higher year-on-year selling prices. Acquisitions added 2.3 percent to sales and foreign exchange impacts added another 0.1 percent.

Sales growth was strongest in Industrial and Transportation at 14.3 percent, Safety, Security and Protection Services at 9.4 percent, Consumer and Office at 6.1 percent and Health Care at 5.4 percent. Sales declined 2.7 percent in Electro and Communications and 8.8 percent in Display and Graphics, as many customers continued to modify production levels in line with weaker demand. On a geographic basis, sales growth was strongest in Latin America/Canada at 9.7 percent and the U.S. at 7.4 percent.

For the full year 2011, 3M posted sales of \$29.6 billion, up 11.1 percent. Five of the company's six business segments posted growth for the year, led by Industrial and Transportation at 19.5 percent and Safety, Security and Protection Services at 15.2 percent. Latin America/Canada was the fastest-growing geographic region in 2011 at 15.6 percent. Full-year 2011 earnings were \$5.96 per share, an increase of 5.9 percent, operating margins were 20.9 percent and return on invested capital was 19.9 percent.

"2011 was a successful year for 3M, with record sales and earnings per share," said George W. Buckley, 3M chairman, president and chief executive officer. "We were resilient enough to achieve these results in the face of deteriorating demand in both Western Europe and consumer electronics. Our commitment to the future continued, with investments of \$1.6 billion in research and development and \$1.4 billion in capital expenditures during the year, aimed primarily at faster growing markets. Our 2011 results demonstrate the underlying strength of 3M's business model, as we once again generated double-digit top-line growth and premium return on capital. My thanks to 3Mers everywhere for another outstanding year."

Buckley continued, "Looking ahead, we believe that slower growth will persist into the first half of 2012, so we will increase attention to the bottom line in the near term. We know that in uncertain times, it is even more important that we innovate and differentiate ourselves, therefore we will preserve key investments in R&D, sales and manufacturing to achieve accelerated growth."

3M affirmed its 2012 full-year performance expectations. The company expects earnings to be in the range of \$6.25 to \$6.50 per share with organic sales volume growth of 2 to 5 percent. Operating income margins are expected to be between 21 and 22.5 percent for the year.

**SUPPLEMENTAL CONSOLIDATED STATEMENT OF INCOME INFORMATION**  
**RECONCILIATION OF GAAP TO NON-GAAP FINANCIAL MEASURES**  
(Millions, except per-share amounts)  
(Unaudited)

In addition to reporting financial results in accordance with U.S. generally accepted accounting principles (GAAP), the company also discusses non-GAAP measures that exclude special items. Operating income, net income attributable to 3M (hereafter referred to as “net income”), and diluted earnings per share attributable to 3M common shareholders (hereafter referred to as “diluted earnings per share”) are all measures for which 3M provides the reported GAAP measure and an adjusted measure (excluding special items). Special items are not in accordance with, nor are they a substitute for, GAAP measures. Special items represent significant charges or credits that are important to an understanding of the company’s ongoing operations. The company uses these non-GAAP measures to evaluate and manage the company’s operations. The company believes that discussion of results excluding special items provides a useful analysis of ongoing operating trends. The determination of special items may not be comparable to similarly titled measures used by other companies.

The reconciliation provided below reconciles the non-GAAP financial measures with the most directly comparable GAAP financial measures for the twelve-months ended December 31, 2010. There were no special items for the three-months and twelve-months ended December 31, 2011, or for the three-months ended December 31, 2010.

	Twelve-months ended December 31, 2010

Reported GAAP measure	\$ 5,918	\$ 4,085	\$ 5.63
Special items:			
Medicare tax change (a)	—	84	0.12
Adjusted Non-GAAP measure	<u>\$ 5,918</u>	<u>\$ 4,169</u>	<u>\$ 5.75</u>

(a) The twelve-months ended December 31, 2010 includes a one-time, non-cash income tax charge of \$84 million, or 12 cents per diluted share, resulting from the March 2010 enactment of the Patient Protection and Affordable Care Act, including modifications made in the Health Care and Education Reconciliation Act of 2010 (collectively, the “Act”). The charge is due to a reduction in the value of the Company’s deferred tax asset as a result of the Act’s change to the tax treatment of Medicare Part D reimbursements.

- (b) The changes in 3M's defined benefit pension and postretirement plans' funded status, which is required to be measured as of each year-end, significantly impacted several balance sheet lines. These required annual measurements increased non-funded pension and postretirement benefits' long-term liabilities by approximately \$2.4 billion (primarily due to a decrease in discount rates) and decreased stockholders' equity by approximately \$1.6 billion, with the other major impact primarily related to increased deferred taxes within other assets. Other pension and postretirement changes during the year, such as contributions and amortization, also impacted these balance sheet captions.

- (d) Free cash flow is not defined under U.S. GAAP. Therefore, it should not be considered a substitute for income or cash flow data prepared in accordance with GAAP and may not be comparable to similarly titled measures used by other companies. The company defines free cash flow as net cash provided by operating activities less purchases of property, plant and equipment. It should not be inferred that the entire free cash flow amount is available for discretionary expenditures. The company believes free cash flow is a useful measure of performance and uses this measure as an indication of the strength of the company and its ability to generate cash.

This measure is not recognized under U.S. GAAP and may not be comparable to similarly titled measures used by other companies.
- (f) The company uses non-GAAP measures to focus on shareholder value creation. 3M uses Return on Invested Capital (ROIC), defined as annualized after-tax operating income (including interest income) divided by average operating capital. Operating capital is defined as net assets (total assets less total liabilities) excluding debt. This measure is not recognized under U.S. GAAP and may not be comparable to similarly titled measures used by other companies.

**BUSINESS SEGMENTS**  
(Dollars in millions)  
(Unaudited)

Effective in the first quarter of 2011, 3M made certain product moves between its business segments in its continuing effort to drive growth by aligning businesses around markets and customers. There were no changes impacting business segments related to product moves for the Display and Graphics segment or the Consumer and Office segment. In addition, 3M results in total did not change. The financial information presented herein reflects for all periods presented the impact of product moves between business segments, which are summarized as follows:

Certain pressure sensitive adhesives products within the Industrial Adhesives and Tapes Division and shock absorption and vibration dampening products used in electronics within the Aerospace and Aircraft Maintenance Department (both within the Industrial and Transportation business segment) were transferred to the Electronic Markets Materials Division (part of the Electro and Communications business segment). In addition, certain medical respirator products within the Infection Prevention Division (part of the Health Care business segment) were transferred to the Occupational Health and Environmental Safety Division (within the Safety, Security and Protection Services business segment). The preceding product moves resulted in decreases in net sales for the total year 2010 of \$152 million in the Industrial and Transportation business segment and \$8 million in the Health Care business segment. These decreases were offset by increases in net sales for the total year 2010 of \$121 million for the Electro and Communications business segment and \$8 million for the Safety, Security and Protection Services business segment along with a \$31 million change in the elimination of dual credit sales and corporate and unallocated.
